

Hypothyroidism Worksheet

The Examiner must review a current status report by the treating physician and any supporting documents to determine the applicant's eligibility for certification. If the applicant **meets ALL the acceptable certification criteria** listed below, the Examiner can issue.

AME MUST REVIEW	ACCEPTABLE CERTIFICATION CRITERIA
Treating physician finds the condition stable on current regimen and no changes recommended	<input type="checkbox"/> Yes
Symptoms and signs	<input type="checkbox"/> None of the following: fatigue, mental status impairment, or symptoms related to pulmonary, cardiac, or visual systems
Acceptable medications	<input type="checkbox"/> Levothyroxine sodium (Synthroid, Levothyroid), porcine thyroid (Armour), liothyronine sodium (Cytomel), or liotrix (Thyrolar)
Normal TSH within the last 90 days	<input type="checkbox"/> Yes

AME MUST NOTE in Block 60 one of the following:

Airman meets certification criteria for hypothyroidism.

Airman had a previous Special Issuance for this condition and now meets the regular issuance certification criteria for hypothyroidism.

Airman does NOT meet certification criteria for hypothyroidism. I have deferred this exam. (Mail the supporting documents to FAA identifying which criteria were not met.)
